GLIDE

THROUGH YOUR NEXT JOB.

MC GLIDE METAL CLAD CABLE for easier pulling!

There's a new cable in town. It's called MC Glide™, but you'll call it a miracle. No more backbreaking pulls. No more damaged studs. Just a smoother, faster experience. It's designed to glide through metal studs and ceilings with ease, without sacrificing flexibility or strength, so you can finish the job in half the time.

MC Glide™ features:

- Easier pulls as the armor is design reduces friction when pulling cable through metal studs and ceilings.
- No need for new tools. Works with the same tools and fittings you use with legacy cables.
- Time savings. MC Glide™ can be pulled in half the time compared to traditional MC cable.
- Cost reduction. Because MC Glide™ is so much easier, your team can work faster and more efficiently.
- Minimize damage to studs. Less resistance means you won't bend or knock down studs.

Construction:

Aluminum armor
UL Classified for Through-Wall Penetrations
MC Lite is a traditional Type MC cable containing one or more copper grounding conductors; the armor is not an equipment grounding means
Aluminum armored cables are RoHS Compliant
Made in USA of US and/or imported materials
Applications

Commercial, industrial, multi-residential branch circuits and feeder wiring, services for power, lighting, control and signal circuits. Exposed or concealed, fished, surface mounted, embedded in plaster, environmental air-handling spaces, open or messenger supported aerial runs, dry locations, in hazardous locations to Class I & II Div. 2 and Class III, Div. 1 & 2 (per NEC® Articles 501, 502, 503, 530), and in Places of Assembly Aluminum Interlocking Armor
